A decorated Flowerpot Set for Easter

v14357

This wooden flowerpot set is planted according to your own taste and then decorated. A painted wooden letter is is glued onto the front of each flowerpot. Other decorations are a cast concrete egg, a painted bird and guinea fowl feathers.

Comment faire

1 Paint one or more of the edge(s) of the wooden bird all the way round according to your own taste.

2 Casting in a real egg: Make a small hole in one end of an egg with a teaspoon. Prick a hole in the egg yolk with a skewer or similar. This is the easiest way of emptying the egg.

3 Empty the egg white and the yolk.

4 Pour ordinary cooking oil into the egg and distribute it by lightly shaking the egg. Now pour out the cooking oil. NB: The oil makes it easier to release the moulded egg at the end when the casting is finished.

5 Mix 6 parts of Concrete craft powder to 1 part of water. Put the concrete mixture in a piping bag (disposable) and fill the egg. Let it harden for approx. 24 hours. A TIP! You can make a piping bag from a plain freezing bag by cutting a hole in the corner.

6 Casting in an egg-shaped candle mould: Coat the mould with ordinary cooking oil (like before) and pour the concrete mixture into the mould. Leave to harden for approx. 24 hours.

7 Removal of both types of moulds: Peel the egg shell off the concrete egg. You may need a knife. Separate the two-part candle mould and gently pry out the cast egg.

8 Decorate the cast eggs according to your own taste; shown here with glued on guinea fowl feathers and a natural hemp waist band.

9 Paint the front and the edges of each wooden letter with Plus Color craft paint. Leave to dry.

10 Glue a letter onto each flowerpot in the three-part set. Use Clear Multi Glue gel and leave to dry.
