

Des fleurs à l'aquarelle sur des oeufs en plastique

v16163

Dessinez des fleurs printanières simples sur des œufs en plastique en utilisant des marqueurs aquarelle.

Comment faire

1 Use a watercolour marker for drawing five small v-shapes in a circle.

2 Use the water brush to brush the v-shapes into petals. The more water, the lighter the colour, but avoid using too much water or the paint will run.

3 Add further details with watercolour markers; for example, dots, texts and leaves. Make the leaves using the same technique used for making the petals.
