Des figurines de Noël en cône en polystyrène et du feutrage à l'aiguille

v14566

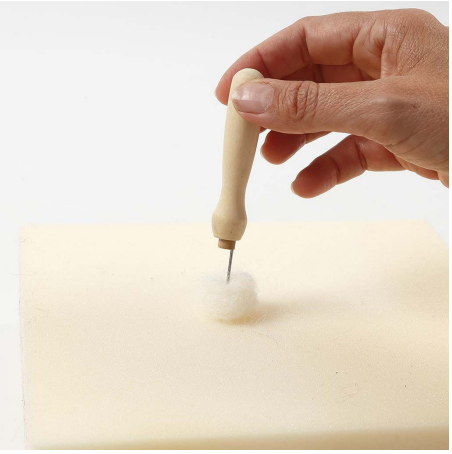
Cette souris et le père Noël sont tous deux faits à partir d'un cône en polystyrène et de laine cardée, laquelle est feutrée à l'aiguille sur les figurines. Des morceaux de feutre découpés sont feutrés sur les figurines à l'aide d'une aiguille à feutrer.

Comment faire

1 Felt small tufts of carded wool onto the polystyrene cone. Use a felting needle and push this up and down repeatedly through the wool.

2 Mark the cone with a pencil to where you wish to change to another colour wool.

3 Twist long tufts of carded wool between your fingers and felt them onto the cone for the collar and the rim of the hat.



4 Make a round shape from carded wool for the bobble on the hat (+ nose and eyes for the face) using a felting needle.

5 Felt the bobble onto the tip of the hat using a felting needle.

6 Felt a large tuft of carded wool onto the figure with the felting needle for the beard.

7 Cut hands/mittens from felt for the figure. (Templates are available as a separate PDF file for this idea).

8 Felt the cut out parts onto the figure.

9 Make the mouse following the same procedure as the Father Christmas.
