

Patinating Ornaments with Pigment Acrylic Paint

v11583

A beautiful ornament in MDF is here patinated using Pigment Acrylic Paint with a brush and a sponge. Decorate the canvas using a rubbing technique and glue on the ornament.

Comment faire

1 Start by dabbing Pigment Acrylic Paint onto the canvas with a face painting sponge. Use light circular movements and only use a small amount of colour at a time. Here we have chosen a light blue and a white for the sky.

2 Paint the ornament with Pigment Acrylic Paint. We have here chosen an ultramarine blue colour.

3 Use a flat brush with a lighter colour to brush lightly over the ornament's ridges. You can also use a foam sponge. Glue the ornament onto the canvas using a glue gun and glue it into the frame.
