

A Christmas Tree on a Metal Stand

v11928

This Christmas tree is made from a punched-out cone decorated with Vivi Gade Design Paper (the London series). It's attached to a metal stand decorated with Inka-Gold.

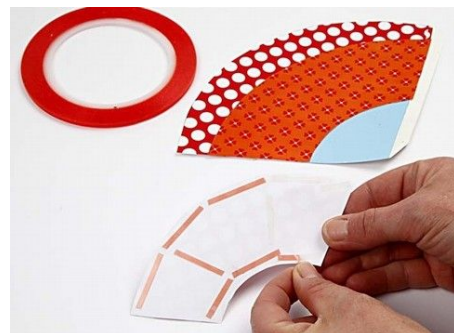

Comment faire

- 1.** Paint the metal stand with Inka-Gold using a sponge or a foam stencil brush. Glue a bead on the top of the metal bar for the tree to rest on.

- 2.** Cut pieces of paper from the London design paper using the punched-out cone as a template. You may paint a part of the cone with Plus Color.

- 3.** Glue the paper onto the cone with a glue stick or double-sided adhesive tape.

4. Attach paper lace borders.

5. Assemble the cone using double-sided adhesive tape. Attach to the metal stand. Decorate with a bead or a bow. Finally glue on the bead cap.
