

A Christmas Tree with Wooden Sticks

v12641

Cut strips of wood into small pieces and drill a hole in the middle of a flower stick which will function as the center piece of the Christmas tree. Glue on the stand with wood glue. Bend the star from bonsai wire and wrap thin silver-plated wire with drop-shaped glass beads around the star.

Comment faire

1. Saw wood sticks in pairs in the following sizes: 13cm x 2 pieces 15cm x 2 pieces 17cm x 2 pieces 20cm x 2 pieces 22cm x 2 pieces 24cm x 2 pieces Also saw some spacers; 2cm squares x 14 pieces.

2. Drill a 6.5mm hole in the middle of all the wood pieces.

3. Glue the stand together.

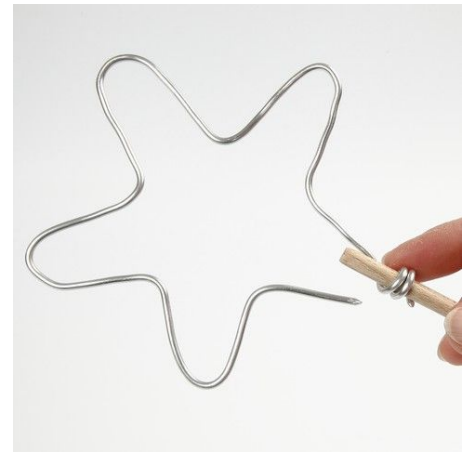

4. Glue a 49cm long flower stick into the hole in the stand.

5. Assemble the Christmas tree. You will need approx. six wood sticks for a Christmas tree.

6. Form a star from a 50cm long piece of bonsai wire.

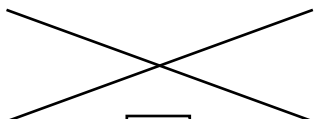

7. Wrap a piece of silver-plated wire with drop-shaped glass bead around the star.

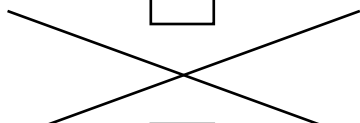

8. Glue decorations onto the wood slices.
