

Stamp Printing on Boxes

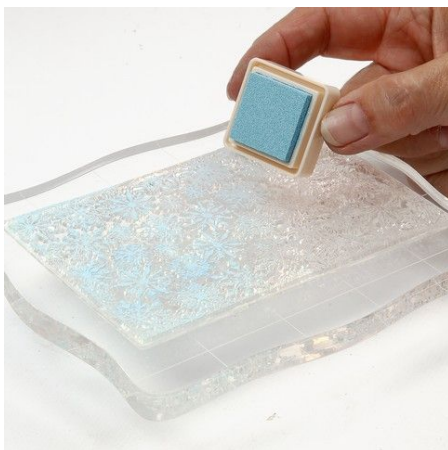

v12823

The small folding boxes are printed with Versa stamp colour and silicone stamps. They are decorated with ribbons, natural hemp and wooden beads.

Comment faire

1. Place the silicon stamp on the acrylic block.

2. Apply paint onto the silicone stamp using the Versa colour pad.

3. Push the stamp down onto folding boxes, cardboard and other products. Let it dry.

4. Now apply another colour paint onto a different stamp.

5. Push the stamp on top of the first coloured print.

6. Tie a ribbon around the box.

7. Tear a small piece of the ribbon thin enough to thread through the wooden button. Tie a bow.

8. Tips: You may apply two different colour paints onto the same stamp at the same time.

9. Tips: When using a small silicone stamp you may push this into the colour pad. This procedure speeds up the process when making many prints.
