

Un Ange en Silk Clay sur une Partie Mécanique

v14386

Ce petit ange est modellé en Silk Clay sur une partie mécanique à remonter. Les petites ailes en nylon, les paillettes et les cheveux en fil argenté sont collés dessus.

Comment faire

1 Mix Silk Clay for your chosen skin tone; here a light skin tone. Make the angel's head as a round ball.

2 Cover the mechanical movement with Silk Clay; make a flared dress in your chosen colour but avoid covering the wind-up mechanism.

3 Roll out Silk Clay sausages. Push these as well as the head and a sequin for decoration onto the dress.

4 Hair: Cut a piece of silver thread and wrap it like a bundle around three (3) fingers. Glue the hair onto the head and a large sequin onto the hair for decoration. Use Clear Multi Glue gel.

5 Glue the finished lightweight wings from thin metal wire with delicate nylon onto the angel's back using Clear Multi Glue gel.

6 Draw the eyes and the mouth with a black Colortime marker.
