

Une boule recouverte d'un Bandana à motif Paisley

v14639

These polystyrene balls are covered with small pieces of fabric from a paisley bandana. All the pieces of fabric are glued onto the ball as decoupage using VTR Glue. Cette boule de polystyrène est recouverte de petits morceaux de tissu provenant d'un bandana à motif Paisley. Tous les morceaux de tissu sont collés sur la boule en guise de découpage à l'aide de colle VTR.

Comment faire

1 Cut a bandana into small pieces. A TIP: use pinking shears which make it possible to attach the fabric neatly and evenly around the ball.

2 Coat the ball in VTR Glue which is ideal for gluing fabric. Place the small pieces of fabric onto the glue.

3 Cut a long narrow swatch of the fabric and glue it around the ball like a ribbon.
