

Des poissons en bois peint

v14648

Ces poissons sont peints sur les deux côtés en utilisant deux couleurs de peinture acrylique Plus Color.

Comment faire

1 Dab both of the large sides of the figure with Plus Color craft paint. Use a foam stencil brush. Leave to dry.

2 Make patterns with Plus Color craft paint in a different colour. You may use the other end of a foam stencil brush to make small dots.

Step 3. -

4 A TIP: The un-painted edges may be sanded with sand paper (80 grade). This makes the wood smoother and any excess paint will be removed. You may also sand the painted sides to add patina to the figure.
