

Une housse de coussin décorée avec des bâtons de peinture pour textile

v14643

Le dessin de cette housse de coussin est fait avec un pochoir et des bâtons de peinture opaque et solide pour la décoration textile.

Comment faire

1 Place a plastic pocket (or similar) inside the cover to avoid smudging the opposite side.

2 Attach the screen stencil (it has a slightly self-adhesive back) onto the cushion cover where you want the design to be. Twist the wax crayon from the paint stick and start painting.

3 Draw along the edge free-hand.

4 Fix the designs with an iron when dry. Place a piece of baking paper between the design and the iron and fix for approx. 4 min.

A TIP: The wax crayons in the paint sticks used in this idea can be washed at 60°C depending on the quality of the fabric used.
